Free Valve Program

Rexroth CERAM™ ISO 5599-1 Pneumatic Directional Control Valve

Unique sliding ceramic plates form a near perfect seal. The CERAM valve is more tolerant of dirty air and harsh conditions than any directional control valve available. The CERAM valve offers an extremely long life (expectancy of 150 million cycles) and won't "stick" like many spool valves. Now you can interchange and upgrade the valve where you are having the most downtime/failures, to the valve some of our customers named the "bullet-proof valve" - **and you can do it for Free!**

We are so confident that our CERAM valve is better than the valves you are currently using, we will give you one to try! We only ask that you meet/agree to the requirements below:

- I agree to install the free valve within 30 days.
- I am not a current user of CERAM valves at this location.
- My location buys/replaces approx. 25 or more pneumatic directional control valves per year.
- I will provide the brand(s) of similar valves I am now using.
- I will identify specifically where the valve will be used for easy identification.
- I will provide feedback on the performance of the valve to Bosch Rexroth.

Name: _____ Email: _____

Company Name: _____

Shipping Address: _____

City/State/Zip: _____

Current brand(s) of pneumatic directional valves: _____

Specify what location/machine valve will be used: _____

I agree to the above conditions in order to receive my free valve.

Signed: _____

Forward the signed form to your distributor or Bosch Rexroth sales representative.

Distributor Organization (if applicable): _____

Distributor Representative (if applicable): _____

Bosch Rexroth Sales Representative: _____

Bosch Rexroth Logistics Approval: _____

Form number (filled in by Bosch Rexroth): _____

Bosch Rexroth Corporation
Pneumatics
1953 Mercer Road
Lexington, KY 40511

Phone: 859-254-8031
Fax: 800-489-4188
E-mail: pneumatics@boschrexroth-us.com

Limitations:

Offer limited to ISO Sizes 1 through 3.
Offer valid for USA/Canada customers only.
Offer expires December 31, 2013.
Limit one free valve per customer location.

To be filled-out by Bosch Rexroth Salesman or Bosch Rexroth Distributor:

Machine name/function: _____

Pre-existing Valve Brand and Model: _____

Problems with existing valve:

Have to maintain/repair current valve every _____ days/weeks/months.

Have to replace this valve every _____ days/weeks/months.

Type of problem experienced – coil failure / spool sticking / leak / valve failure / other

Please note any other problems caused by the downtime: _____

Cycle time or speed of driven actuator: _____

Actuator type, bore size/stroke length: _____

Or air motor speed and displacement: _____

System air pressure: _____

Points to Consider, remember – we are problem solvers:

- Internal/external pilot requirements
- High speed applications – Not for the Ceram valve
- Lubricated air – could eliminate if not required for actuators (cost savings)
- Recognize downtime costs – production loss, repair parts, replacement costs, maintenance labor cost

Recommended Rexroth components:

Ceram Valve Part No: _____

Electrical connector(s) part number (if customer's existing connector(s) are not compatible:

Subbase part number (only if replacing a non-ISO valve): _____

Additional comments/concerns: _____
