

# ASDA-A2 Series Features

## High Positioning Accuracy

- ECMA series servo motors feature incremental encoders with 20-bit resolution (1280000 p/rev) which can eliminate unstable commands at low speed, smooth motor operation and enhance the accuracy of positioning.
- Absolute encoder supported. 17-bit motor position will not get lost when power is cut off.

1280000 p/rev(Incremental)

## High Responsiveness

- Up to 1kHz frequency response.
- Settling time below 1ms.
- 7ms acceleration time for speeds from -3000r/min to 3000r/min with an empty load!  
(Note: The test record of a 400W motor with 60mm frame size)
